
Questions: Dale Gas & Oil Bid #03-54931-0230-33

Q: Is the gas station active?

A: Not at this time, but they are in the process of building an aboveground gas distribution system.

Q: Are the tanks removed?

A: All USTs have been removed from the site. Only ASTs remain.

Q: Was free product removed from PZ-1 and B-1?

A: As of May of 1999, approximately 31 gallons of product have been removed using passive recovery methods.

Q: Contaminant mass was determined to be 4,340 lbs. of free product, 8.3 lbs. dissolved phase, and 0.30 lbs. contaminants in soil. What are the constituents in dissolved phase and contaminants in soil ?

A: All available laboratory data is contained in the Site Investigation Reports.

Q: The basis for specifying the progress shall be contaminant mass reduction at B-1, B-3, PZ-1, PZ-7, and PZ-8. Which one (free product/dissolved phase/contaminant mass in soil) should be used to determine the progress ?

A: Both free product and dissolved phase contaminant mass reduction will be used to determine remedial progress.
